

Need your comment about “Boost Regulator” in “Pro Ski GP & Modified”

Referring to IJSBA rules about “Boost Regulator” as in the following link <http://www.ijsba.com/ijsba-releases-boost-regulator-requirements-for-ski-gp-and-mod-classes/> Many riders have expressed their disagreement with this IJSBA rule because it will affect the riders who plan to participate in Jet Ski World Cup 2017 in 1. Pro Ski GP (use “2017 IJSBA Modified Rules”) and in 7. Pro-Am Ski Modified.

In the name of Jet Ski World Cup Tournament, one of our policies is trying to be neutral and letting all riders and all jet ski brands race together. So, we need to get any official comments, especially from riders who will apply to race in these 2 classes in order to find the best agreement for all jet ski brands that are homologated in “2017 IJSBA Modified rule”.

Now we have 3 ideas for this issue : A. Follow IJSBA rules, B. Indicate suitable boost pressures and C. Allow no limit for boost pressures (As in 2016 GP Rules)

Please send your comment directly to info@jetski-worldcup.com to reach an agreement.
